ABOUT

SHANGHAI SYSTEM INTEGRATION LAB

Shanghai System Integration Lab (SIL) is an international-level technological innovation platform co-established under the strategic support of the Pudong New Area Government of Shanghai and Shanghai University, led by Academician Benoît Dubuis, President of the Swiss Academy of Engineering Sciences and leader of the Shanghai High-Level Talent Team.

Focusing on cutting-edge fields such as biomedicine and microelectronics, the center aims to build a full-chain innovation system of "concept verification - technology incubation - industrial landing". It serves as a core hub linking scientific and technological innovation resources between China and Switzerland, focusing on the "last mile" of transforming cutting-edge scientific and technological achievements. It specially provides professional and full-chain concept verification services for high-potential innovative projects, and builds a scientific and technological innovation bridge for two-way empowerment and coordinated development between China and Switzerland.

I. Core Mission

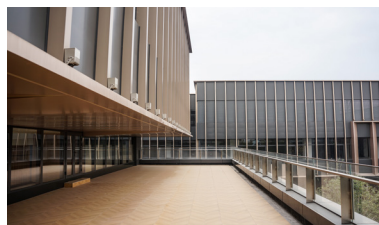

Relying on Switzerland's top innovation ecosystem and China's huge industrial market, we will break down the scientific and technological innovation barriers between China and Switzerland, promote the two-way flow of innovative concepts, technological achievements, talent resources and industrial capital, help scientific and technological innovation projects move from "conceptual conception" to "practical implementation", cultivate high-quality scientific and technological innovation enterprises with international competitiveness, and deepen scientific and technological innovation cooperation between China and Switzerland.

II. Core Functions

✓ International Concept
Verification

✓ Incubator for High-Potential
Chinese and Foreign
Innovative Projects

✓ Chinese and Foreign
Industrial Landing

III. Venue Reality

The first phase covers 2,900 square meters of innovation space, equipped with multiple independent offices ranging from 20 to 60 square meters, more than 70 co-working stations, 2 ten-thousand-level laboratories with a total area of 110 square meters, and 3 general laboratories with a total area of 140 square meters. At the same time, it is equipped with supporting spaces such as shared meeting rooms, pantries, and roadshow activity exhibition areas for project teams to use.

IV GateChallenge

As a world-renowned zero-equity startup acceleration platform, MassChallenge is committed to linking global innovation resources and empowering the growth of high-potential startups. As an important innovation acceleration platform of MassChallenge in China, GateChallenge relies on MassChallenge's global network and China's local industrial resources, focusing on cutting-edge technology, smart health, sustainable technology and other fields, building a bridge for Sino-Swiss scientific and technological innovation connection, and helping high-quality Chinese projects link with Europe's top innovation ecosystem.

V Operating Entity

Shanghai System Integration Lab Co., Ltd., the operating entity of Shanghai System Integration Lab (SIL), is jointly established by Shanghai University, Shanghai Pudong Talent Development Co., Ltd., Shanghai Jinqiao Collective Asset Investment and Operation Management Co., Ltd. and Academician Dubuis' team.

With open arms, Shanghai System Integration Lab (SIL) warmly welcomes university teachers and students, researchers, returnee entrepreneurs at home and abroad, as well as various outstanding entrepreneurs from enterprises who have hard technological achievements, are eager to transform their achievements into products, have entrepreneurial passion and potential, are eager to realize their own value, and need capital support and project incubation to apply for concept verification support and settle in for incubation here, so as to realize their dreams of innovation and entrepreneurship.
